

Tara Manicsic

Content & curriculum leader — I build education that sticks and teams that ship.

tzmanics@gmail.com · linkedin.com/in/tzmanicsic · tarateaches.dev · github.com/tzmanics · Cincinnati, OH

EXPERIENCE

Engineering Manager — Templates

Netlify · [add dates]

- Built and led the team behind Netlify's official templates through rapid product and framework change — kept the team shipping, communicating, and intact through re-orgs and shifting priorities.
- Turned template quality into a repeatable process (ownership, scheduled checks, honest definitions of done) instead of a heroic effort.

Developer Experience Engineer

Netlify · [add dates]

- Tech lead for Jamstack Explorers, a multi-creator learning platform with video missions, hands-on paths, and a certification path — shipped the mission structure, creator tooling, and launch across engineering, education, design, and marketing.
- Authored tutorials, guides, and courses on modern web development for the Netlify blog and learning properties.

Developer Advocate — Kendo UI

Progress · [add dates]

- Created technical content, workshops, and international conference talks helping JavaScript developers build better applications.

[Earlier roles — add as desired]

[Company · dates]

COMMUNITY LEADERSHIP

- Founded the Cincinnati chapter of Women Who Code and the Cincinnati branch of NodeSchool — recurring events, mentor-dense rooms, and a leadership pipeline that kept both running beyond my involvement.

SPEAKING & RECOGNITION

- International speaker and workshop leader: JSConf EU 2019 (“ES2019 Features: What Even Are They?”), TechLead Conf 2023 (“Processes for the Process-Averse”), ng-conf (workshop + conference co-emcee, 2018–2019), DevReach, DonutJS, and more.
- Google Developer Expert (GDE).

SKILLS

Curriculum architecture & assessment design · certification programs · technical content strategy · team leadership through change · developer education · community building · JavaScript/TypeScript · Astro, Angular, Node.js · Jamstack architecture · AI literacy education
